Subject index

Volume 4

Acacia senegal
gum, fractions, spectroscopic/molecular comparisons 305
Aflatoxins
detection of, gum arabic 221
Agar
swelling/shrinking gel, weight changes in, empirical model 69
Alcoholic beverages
foaming, effect of ethanol content 77
Alginate
propylene glycol/protein aqueous solution, foaming 395
structural characterization, liquid chromatography 59
Alginates
effects of heat 215
Ammonium salts
effect of, kappa-carrageenan rheological/thermal properties 227
Anionic ions
effects of structuring/destructuring, rheology—thermally induced β-lactoglobulin gels 267

Brown seaweed
sodium alginate viscosity, effects of formaldehyde pretreatment 41

Calcium
anions, effects of, casein aggregation rate 239
Calcium gluconate
fortified soy milk, stabilization 415
Carboxymethylcellulose
complexation with potato waste effluents, protein recovery 355
Carrageenan
effect of, thaumatin sweetness intensity 323
interaction, thaumatin, effects of pH/temperature/competing cations 379
level, effects of, infant formula 95
swelling/shrinking gel, weight changes in, empirical model 69
thaumatin interaction, effects of pH, temperature, competing cations 105
κ-Carrageenan
11S globulin—water, light scattering, thermodynamics 469
rheological/thermal properties, effect of ammonium salts 227
Casein
adsorption, effects of, polystyrene lattices surface tension/rheological properties 33
aggregation rate, effects of calcium anions 239
micelles, interaction, phosvitin, milk 149
whey ratio, effects of, infant formula 95
Corn
starch gels, behaviour under compression 289

Divalent cations
effects of, gellan gum rheology 495

Ethanol
content, effect on foaming, alcoholic beverages 77

Food proteins
functional properties 429
Formaldehyde
pretreatment, effects on sodium alginate viscosity, brown seaweed 41

Galactomannan
xanthan gum, synergistic interaction 489
Gelatins
from pigskins, characteristics 299
Gellan gum
rheology, effects of monovalent cations/divalent cations 495
Globin
gelation, effects of pH/temperature 87
11S globulin
—kappa-carrageenan—water, light scattering, thermodynamics 469
Glucomannan
xanthan gum, synergistic interaction 489
Glycanase tests
reducing sugar assays application 481
Gum arabic
aqueous solutions, treatment with UV radiation 313
detection of aflatoxins 221
functionality, effects of added proteins, soft drink emulsion systems 177

Hydrocolloids
effects of, gel mechanical properties 257
Hydroxyethylcellulose
effects of, lecithin-stabilized emulsions 205

Ice cream cones
baking plates, residues 49
Infant formula
effects of phospholipid level/carrageenan level, casein/whey ratio 95

Inorganic salts
effects on soybean globulins emulsifying properties 1
Isopropanol
precipitation, locust bean gum purification 277

β-Lactoglobulin
gel structure, viscoelastic behaviour 121
gels, thermally induced, rheology, effects of anionic ions structuring/destructuring 267
heat denaturation, effects of concentration 19
Lecithin
stabilized emulsions, effects of sucrose/hydroxyethylcellulose 205
Locust bean gum
purification, isopropanol precipitation 277

Milk
phosvitin/casein micelles interaction 149
proteins, competitive adsorption, phosvitin, oil-in-water emulsions 403
Minerals
effects of, gel mechanical properties 257
Monovalent cations
effects of, gellan gum rheology 495
Mung bean
starch, granule stability 365
Mustard seed
mucilage viscosity, effects of temperature, electrolytes 161

Phospholipid
level, effects of, infant formula 95
Phosvitin
competitive adsorption, milk proteins, oil-in-water emulsions 403
interaction, casein micelles, milk 149
Pigskins
gelatins from, characteristics 299
Polysaccharide
emulsions, creaming/flocculation 185
hydrophilicity, quantitation 197
Polystyrene lattices
surface tension/rheological properties, effects of caseins adsorption 33
Potato
waste effluents, protein recovery, complexation with carboxymethylcellulose 355
Propylene glycol
protein, alginate, aqueous solution, foaming 395

Protein
—polysaccharide interaction, role 429

Reducing sugar assays
glycanase tests, application 481
Rice
starch gels, behaviour under compression 289

Sodium alginate
viscosity, effects of formaldehyde pretreatment, brown seaweed 41
Soft drink
emulsion systems, gum arabic functionality, effects of added proteins 177
Soy milk
calcium gluconate-fortified, stabilization 415
Soybean globulins
emulsifying properties, effects of inorganic salts 1
Sucrose
glass transition, Brillouin scattering study 137
hydroxyethylcellulose, lecithin-stabilized emulsions 205

Thaumatin
carrageenan interaction, effects of pH, temperature, competing cations 105
interaction, carrageenan, effects of pH/temperature/competing cations 379
sweetness intensity, effect of carrageenan 323

Urea
induced whey protein gels, effects of pH/thiol reagent/time 245

Water-in-oil-in-water
double emulsions, analysis 339
Wheat
starch gels, behaviour under compression 289
Whey
casein ratio, effects of, infant formula 95
Whey protein gels
urea-induced, effects of pH/thiol reagent/time 245

Xanthan gum
glucomannan, galactomannan, synergistic interaction 489
